

## PHT-200 信号灯幻象测试装置 PHT-200 signal lamp phantom test device

- PHT-200信号灯幻象测试装置配合GO-HD5高精度交通及车用灯具配光性能测试系统，用于交通信号灯幻象测试，符合EN12368-2006，GB14887-2003标准要求与其他相应国际标准要求。

PHT-200 signal lamp illusion testing device is used for traffic signal lamp illusion testing in conjunction with GO-HD5 high-precision traffic and vehicle lamp light distribution performance testing system, which meets the requirements of EN12368-2006, GB14887-2003 standards and other relevant international standards.

### 技术参数 Specifications

| 型号        | WLT-200                    |
|-----------|----------------------------|
| 准直 A 光源色温 | 380nm ~ 780nm              |
| 工作面光斑尺寸   | Φ100mm ~ Φ500mm 可调 (10 米处) |
| 光斑照度不均匀性  | 5%                         |
