GT-7071-SWI 成鞋防水試驗機

SHOE WATER RESISTANCE TESTER

本儀器適用於測試成鞋。在一規定水深度的整只鞋子經受旋轉濕刷的機械洗刷，測量鞋子的水穿透性。

This tester is used to examine the water resistance for the whole shoe. The whole shoe in a defined depth of water is subjected to the mechanical action of rotating wetted brushes. The extent of water penetration is determined by examination.

刷子旋轉速度 Rotation speed of brushes	(85±5)cpm
橫向速度 Horizontal speed of brushes	(20±2)轉/分(1轉等於一完全的前后位移) (20±2) rpm (1 cycle is one backward and forward movement)
水流率 Water flow rate	(0.50±0.1) L/min
計時器 Timer	0.01s~9999h 可調Adjustable
體積 Dimension(W x D x H)	110x93x128cm
重量 Weight (approx.)	300kg
電源 Power	1 ϕ , AC 220V, 50Hz, 3A (依國別或指定 Specified by user)
