GT-7001-D 微電腦紙箱耐壓試驗機

Micro-Computer Container Compression Tester

GB/T 4857.4-1992、ISO 2872-1995、JIS Z-0212: 1998、
TAPPI-T804 om-2002、QB/T 1048-1998、ASTM D642-00

本機對運輸包裝件受到壓力時的耐壓及包裝對內裝物的保護能力。將試驗樣品置於試驗機兩平行板之間，然後均勻施加壓力，記錄載荷重和壓板位移，直到試驗樣品發生破裂，或壓板荷重、位移達到預定值為止。

It's used for testing the protective capability of packing materials, which are subjected to a specified load. Place the specimen being tested between two plates and apply a uniform pressure by this machine, record the load and the movement of the plate, until the specimen breaks or load and the plates reach the setting values.

容量 Capacity	2000 / 5000 kgf	
單位切換 Unit	kgf、gf、tonf、lbf、N、kN 供選擇	
分解度 Resolution	1/50,000	
試驗力示值誤差 Load Accuracy	小於±0.5%	
測試空間 Test space (WxDxH)	1200x1200x 1000 mm(測試空間可依據客戶的需求設計 can designed according to the requirements of customers)	
壓縮速率 Compression velocity	無段變速 Variable	
體積(約) Dimension(approx.)	主機 Main unit	1530x1250x2050 mm
	控制箱 Control unit	114x69x 134 cm
重量(約) Weight(approx.)	主機 Main unit	1050 kg
	控制箱 Control unit	240 kg
電源 Power	3φ 380V (依國別或指定or specify)
