

# 2K Piston Inserter

Fast, Cost-effective Piston Insertion

It is a fast, convenient, and cost-effective way to install our revolutionary AF pistons.

Atlas™ 2K Piston Inserters are a fast, convenient and cost-effective way to install Nordson EFD's AF™ Air Free pistons in 50mL, 200mL, and 300mL Side x Side cartridges.

## Features and Benefits

- Simple to set up and operate
- Pistons seat correctly every time
- Compact, space-saving footprint
- Rugged, lightweight units are easily transported for different jobs
- Three different models for 50mL, 200mL, and 300mL Side x Side cartridges
- Optional conversion kits allow 50mL unit to handle 200mL cartridges; 200mL unit to handle 50mL cartridges. The 300mL unit can also handle 200mL cartridges.
- Designed for use with AF pistons that virtually eliminate trapped air

## AF Air Free Pistons

Self-venting AF Air Free pistons combine excellent chemical compatibility with an airtight, leakproof seal that ensures safe shipment and long shelf life. They also save time and effort by eliminating the need to insert shims or bleed plugs during the packaging process.

As they are inserted into the cartridge, AF Air Free pistons quickly bleed any air left between the material and the piston. A unique plug in the center of the piston automatically closes when all air has been removed and the entire piston face contacts the material.

Part #	Description
7015502	50mL Piston Inserter
7015503	200mL Piston Inserter
7362105	300mL Piston Inserter
